Zoom - <https://iese.zoom.us/my/iese.online>

Our Mission: Eradicating pesticides and reducing the carbon footprint of agriculture through AI and robotics. Technology: Our autonomous electric UGVs employ advanced sensors for real-time crop and weed management. Utilizing big data and predictive AI models to provide actionable insights for farmers.

Available opportunities: Internship

At ALAIIKA we are building the future of Financial Services, with the vision to build the leading challenger firm within Financial Services by pairing leading business and technology expertise across our three brands ALAIIKA Advisory (Strategy Consulting), ALAIIKA Building (Company Builder), and ALAIIKA Capital (Investment Company). Founded in October 2022 by the Financial Services Practice Lead Partner of a leading US strategy consultancy and a builder/investor of multiple leading software companies, we already bring together the best of both worlds: deep functional Financial Services domain expertise/networks, and a track record of how to build and invest into leading software product companies.

To properly advise Fortune 500 Financial Services companies in the present and future, we believe in building a new ecosystem that merges tech, venture, and product building expertise with direct board-level access to leading Financial Services institutions.

Available opportunities: Full-time

info@andreasolercoaching.com

Andrea Soler Life Coaching was created to help people embrace change and achieve their goals faster than they ever thought possible. Using proven mental coaching tools, clients shift thought patterns, connect with their emotions, and uncover how their actions are shaped by their mindset. Our personalized, results-driven approach provides the clarity, confidence, and support needed to overcome obstacles, unlock potential, and build a life that feels truly aligned with their deepest aspirations.

Available opportunities: Internship

<https://heyava.com.br/home>

AVA is revolutionizing the way people record, preserve, and share their life stories by offering experiences of emotional connection and self-awareness, powered by artificial intelligence that evolves with each user in a secure personal network.

Two market 'pains' we wanted to address when we launched the startup:

1. During the covid pandemics, a lot of life stories faded away as people affected didn't registered or share them.
2. Internet (especially with social media) is being used to spread goodwill to people. Instead of love, it generates hate.

That's why we came up with a digital solution to help people create, store and share true love and happy moments.

Available opportunities: Internship & Full-time

<http://www.bcnbnc.io>

Bamboo Energy offers a software platform to manage and monetize energy flexibility of distributed energy resources in electrical markets. Our B2B2B solution is commercialized as SaaS model for energy companies willing to offer new energy services to their clients. The software platform allows to reduce the energy bill for the end consumer while reducing energy systems cost and increase renewable energy penetration, thus contributing to the energy transition.

Available opportunities: Internship

<https://bambooenergy.tech/>

Barcelona Blockchain Network (BCN B C N B C N) is an incubator, accelerator and seed investor focussing on launching and supporting companies applying AI, blockchain & web 3.0 technologies and principles. Crypto is not about trading Dodge coins or buying an overpriced NFT. Crypto is one element of the next generation of the Internet 3.0 which aims to be a decentralized version of the virtual world. In this new world, users can interact and collaborate intelligently without worrying about the central, data-specific repositories in a peer-to-peer internet with no single authority.

Put simply; Web 3.0 is more like a system for the users, ideated by the users, in the form of creator-driven platforms. And to make this Web 3.0 more inclusive and less biased, blockchain technology is the resource to focus on.

BCN B C N B C N is on a mission to take part in this next internet revolution and shape it with its own projects and investment in promising teams to co-create the future of the web 3.0. by applying blockchain technologies and leveraging cryptocurrencies

Available opportunities: Internship & Full-time

<https://www.brickbro.com/>

Brickbro promotes its innovative digital platform designed to optimize the buying, selling, and leasing of commercial real estate. Leveraging advanced technology such as Big Data and Artificial Intelligence (AI), the platform analyzes over 30,000 parameters, including traffic data, urban regulations, and market trends. This allows Brickbro to provide tailored recommendations and significantly reduce transaction times—closing sales in under three months and leases in just 27 days.

The platform addresses inefficiencies in traditional real estate markets by offering real-time market insights, enhancing transparency, and maximizing asset value for investors and businesses. Brickbro is the ideal solution for clients seeking fast, efficient, and data-driven results in the commercial real estate sector.

Available opportunities: Internship & Full-time

Shayp is an IoT enabled SaaS company that helps building managers to monitor their water consumption in real-time. With our AI-driven software, we detect anomalies and misuse, we help reduce usage, we keep properties safe and we keep water bills under control with over 20% savings on average.

Available opportunities: Internship & Full-time

<https://www.shayp.com>

Space4Good is an innovative social enterprise utilising earth observation for social and environmental good. Using remote sensing, GIS and artificial intelligence, we map, analyse and model complex ecosystems and support leading organisations and institutions on topics such as forest protection and restoration, regenerative agriculture and agroforestry as well as peace & justice. By doing so we help impact makers on the ground to make more informed decisions, improve operational efficiency, create data-driven transparency and unlock new revenue sources. Our most acknowledged and requested applications and services cover deforestation detection, afforestation monitoring, above-ground biomass assessment as well as biodiversity measurements which we conducted for organisations such as Barry Callebaut, Rabobank, Amnesty International, The World Bank, Red Cross and many more NGOs, governmental entities, research institutes and multinationals across 60 countries. The topics we address and the respective insights we create, contribute to the whole SDG "Wedding Cake": maintaining and regenerating our biosphere, enabling a just and peaceful society, and unlocking a restorative economy.

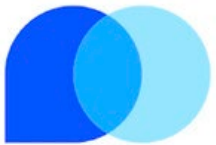

Available opportunities: Internship

<https://www.tekmaneducation.com/>

We are a publishing company specializing in mathematics and language education.
